LEGISLATIVE UPDATE

2018 General Legislative Session

Issue #3

February 11, 2018

Welcome to the 2018 Legislative Update

This issue includes highlights of week three, what we can expect in the week ahead, and information for protecting wildlife and the environment. Please direct any questions or comments to Steve Erickson: erickson.steve1@comcast.net.

About the Legislative Update

The Legislative Update is made possible by the **Utah Audubon Council** and contributing organizations. Each Update provides bill and budget item descriptions and status updates throughout the Session, as well as important Session dates and key committees. For the most up-to-date information and the names and contact information for all legislators, check the Legislature's website at www.le.utah.gov. The Legislative Update focuses on legislative information pertaining to wildlife, sensitive and invasive species, public lands, state parks, SITLA land management, energy development, renewable energy and conservation, and water issues. The Update will be distributed after each Friday of the Session. We may also send out additional Action Alerts during the Session as issues arise that need quick action. We hope each Update

issue will prepare you to call, email or tweet your legislators with your opinions and concerns!

ACTION ALERT!

Urge your Senator and Representative – as well as legislative leadership (ie, members of the Executive Appropriations Committee listed on pg 19) – to enact legislation and provide sufficient funding for conservation programs and agency staffing that will protect Great Salt Lake and improve wildlife habitats and our air quality.

Voice your opinions on legislative efforts that undermine environmental regulation and management of the public lands in our state!

News of the Second Week (Week # 2)

House and Senate leaders met with the Salt Lake City Council Tuesday to reassure everyone that their plans for an inland port in the City's Northwest Quadrant will be developed collaboratively. So far, no inland port bill has emerged. We are watching this very closely and will keep you posted.

The most contentious environmental issue in a crazy week on the Hill was the debate over HB 136, Rep. Mike Noel's bill, which would intimidate and chill free speech of governmental entities who might "intend" to have a different view of federal land designations than that of the Legislature. Predictably, it advanced to the House floor. The Energy Solutions tax break bill (HB 169) also advanced, even as the company seeks approval for a new landfill for non-haz, non-rad waste (SJR 11) and pursues approval for disposal of long-lived depleted uranium. Meanwhile, the "Extraterritorial Jurisdiction" bills (HB 124, HB 135) that would reduce Salt Lake City's role in protecting the Cottonwood Canyons watersheds haven't been heard yet - but could surface any day now.

Budget News

In the convoluted budget process that leadership has followed for the past several years, once the base budgets were approved last Tuesday, Appropriations Subcommittees rapidly went through requests for new money for FY19 and additional supplemental requests for the current fiscal year (FY 18). This Tuesday they will finalize their recommendations - after fewer than 9 hours of public

deliberation. Budget projections will be released this week, so Appropriations Subcommittees will find out soon whether there's any money to fund their wish lists - if leadership (EAC) deigns it to be.

On that note, NRAE budget requests for continuing Sage Brush Rebellion 3.0 total several million dollars, funneling money for lawsuits on RS 2477 roads and against CA's coal tax, and to cronies to lobby against federal sage grouse plans (Big Game Forever) and promote their anti-federal lands agenda (FIRM). We have more productive ideas.

Our priorities for funding include: \$100,000 one-time in research on salinity in Great Salt Lake and \$50,000 on-going for staffing the GSL Salinity Advisory Council, \$100,000 to FFSL for a Rivers Analyst, \$500,000 one-time for the Le Ray McAllister critical lands preservation fund, \$500,000 for phragmites removal, and supporting DNR's request for \$500,000 for work on habitats to prevent species from being "listed" as threatened or endangered under the ESA, and \$40,000 for a rare plant database. Please contact legislators to encourage their support of smart management and protection and restoration of habitats, not more anti-federal political posturing and losing lawsuits.

What's Ahead

The schedule for floor and committee meetings changes again this week. Appropriations Subcommittees conclude their work on Tuesday, so Standing Committees will hear and vote on bills from 8:00-10:00 each day and from 2:00-4:00 M-T-Th. Floor time will be from 11:00 to 12:15, as before, with additional floor time from 2:00 to 4:00 W-F.
