LEGISLATIVE UPDATE

2019 General Legislative Session

Issue #6

March 10, 2019

Welcome to the 2019 Legislative Update

This issue includes highlights of week six, what we can expect in the week ahead, and information for protecting wildlife and the environment. Please direct any questions or comments to Steve Erickson: erickson.steve1@comcast.net.

About the Legislative Update

The Legislative Update is made possible by the **Utah Audubon** Council and contributing organizations. Each Update provides bill and budget item descriptions and status updates throughout the Session, as well as important Session dates and key committees. For the most up-to-date information and the names and contact information for all legislators, check the Legislature's website at www.le.utah.gov. The Legislative Update focuses on legislative information pertaining to wildlife, sensitive and invasive species, public lands, state parks, SITLA land management, energy development, renewable energy and conservation, and water issues. The Update will be distributed after each Friday of the Session. We may also send out additional Action Alerts during the Session as issues arise that need quick action. We hope each Update

issue will prepare you to call, email or tweet your legislators with your opinions and concerns!

ACTION ALERT!

Contact your Senators to oppose the bill to expand the Utah Inland Port (HB 433) to rural "hubs". It was altered, but it still would grab more land and money to subsidize export of dirty energy fuels. Coupled with new bills to fund these fossil fuel exports (see SB 152, SB 228, SB 268), Republican leadership is making a major investment in infrastructure which may prove costly and underutilized as future politics and markets dictate.

Continue to contact the Governor's office at 801.538.1000 and urge him to veto Energy Solutions' HB 220!

Budget News

News of the Sixth Week (Week # 6)

We still support a good I-Port bill (SB 144), despite disappointing changes eliminating monitoring for noise and light pollution from the data collection. It should pass this week, as Rep. Gibson is the House sponsor.

SB 52 - Secondary Water Metering Requirements, went through its 5th iteration before it passed the Senate. The deadline for water suppliers to meter secondary water and the \$20 m. in funding to assist that effort have been removed from SB 52, though it authorizes loans from DWRe and does require suppliers to plan for conversion.

House floor amendments to HJR 23 to rescind the legislative approval of the Promontory Point landfill basically neutered it, so we've worked to amend it back to its original form. If that can't be done, we will work to make sure it dies by sine die.

Enactment of HCR 10 and HB 265 that benefit Great Salt Lake was a highlight. Some good water bills have or likely will become law (see HB 31, HB 360, HJR 1, SJR1, SB 17). Unfortunately SB 214 restricting property tax revenues for water has been deep sixed. Likewise HB 377. Though held in committee, HB 304 to tax carbon emissions got a hearing and was well received!

HB 320, to block cities from enacting laws to reduce packaging waste, remains circled and is unlikely to pass. No such luck with the passel of anti-public lands bills.

The Executive Appropriations Committee will meet on Monday morning (3/11) for the first time in about a month. It's hard to know what to expect. Due to all the time and effort spent on sales tax reform (HB 441) only to see it put off for another day, less attention appeared to be paid to constructing the budget. So not much has changed, or at least been revealed, lately.

I'm told our budget priorities are still in good shape, but last week (minute?) shenanigans could alter that. Still in the hopper are \$500,000 in on-going funding for phragmites eradication, \$500,000 for Great Salt Lake research, and \$400,000 for water banking study and pilot program. Calls, texts or emails to EAC urging funding for Great Salt Lake and the environment can still help.

Several of the Legislative Clean Air Caucus's funding requests to improve air quality improvements have passed and are likely to be funded, while others remain in play.

What's Ahead

The last Standing Committees of the Session will meet throughout the day until 4:00 on Monday. From there on, it's floor time all the time to the end. Budgets get finalized hopefully, bills will be prioritized for action by leadership, rules will get suspended, and surprises always arise as the Session careens to midnight Thursday. Hang on to your hats!
